Sexual Health Store

Welcome to the University of Guelph Sexual Health Store, brought to you by the Wellness Education and Promotion Centre!

The Sexual Health Store is an inclusive, sex-positive, and welcoming space for all U of G students to purchase inexpensive sexual health products and learn about available sexual health resources.

Some helpful tips and definitions when shopping for sexual health products:

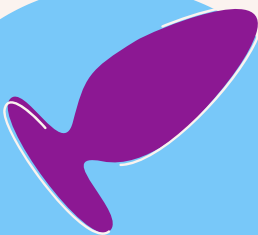

WATERPROOF VS WATER RESISTANT?

Waterproof toys won't break down when exposed to water. This means that they can be completely submerged in water (e.g. in a bath). Water resistant toys can tolerate some exposure to water, but cannot be submerged.

WHAT LUBE TO USE?

When having sex and using sex toys, water-based lube is your best bet. Water-based lube is safe to use with all condoms and sex toys, while other lubes, such as silicone-based lubes, cannot be used with silicone sex toys.

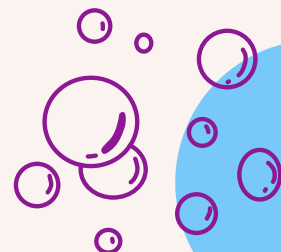

WHAT 'ANAL SAFE' MEANS?

Anal safe toys are sex toys that are specifically designed for anal play. For sex toys to be safe for anal play, they have to have a flared base so that the toy does not get sucked up the anus.

HOW TO CLEAN YOUR SEX TOYS?

The gold-standard for cleaning sex toys is using warm water, mild liquid soap, and letting the toy air dry. However, there are many sex toy cleaners that are available and safe to use.
